## Skills

---

- Extensive knowledge of audio software. Highly proficient with digital audio workstations and editing software such as Ableton Live, Mixcraft, Audacity, and FL Studio.
- Highly skilled with outboard audio equipment and hardware such as microphones, mixing desks, loudspeakers, preamps, audio interfaces, multitrackers, field recorders, and more.
- Detail-oriented and quick to learn new software and equipment.

## Work

---

- 7+ years of home recording experience, engineering, mixing, and mastering, working with a wide variety of genres and instruments. Proficient with digital and analog recording.
- Hosted a three hour shift at WNIA 89.1 FM Big Bang Radio at Nash Community College every Wednesday from 8/15/2023 to 12/13/2023, performing as an on-air talent, making announcements, providing news stories, and local weather. Operated RadioDJ automation software, the mixing desk, outboard gear such as amplifiers and compressors, and microphones.
- 4+ years of freelance remote audio engineering, primarily editing and mixing vocals for a wide range of music genres, as well as providing mastering and additional instrumentation.
- Wrote, produced, and performed an hour long radio show titled "Stolen Sounds" for WNIA 89.1 FM Big Bang Radio at Nash Community College. Selected appropriate music, operated the mixing board and RadioDJ automation software, played self-produced bumps, transitions, and music beds; and performed pre-written voiceover segments detailing the history of sample-based music. <https://soundcloud.com/skelepants1254/stolen-sounds-episode-0-wnia-891-fm-big-bang-radio>
- Wrote five pieces of music for a currently unreleased indie video game, MIDI arranging orchestral and electronic background music.

## Education

---

Nash Community College, Rocky Mount, NC

Fall 2022 - Present

Broadcasting and Production Technology

GPA: 4.0
